Hello Jesse,

Thanks for the updates re: liaison contact for DDPHE. We are looking forward to the OU reports at the next CAG meeting. In the meantime, can we confirm your participation at the May and June meetings? The agency updates from EPA, CDPHE and DDPHE are valuable to the community. Looking forward ...

Sincerely,

LaMone Noles

Denver is working on the development of the scope for the investigation at the operable unit. Denver will send me an updated draft scope the last week of April. The scope collects the environmental information of the OU and will serve as the basis for the remedial investigation.

Regarding the meeting, I will not participate in it.

Keep safe.

Jesse
